

Appendix 2. Birds from Bosques Protectores Los Cedros, Mashpi, Maquipucuna, and the Intag Valley.

Sorted alphabetically by English common name. Data compiled from Ebird records

from Bosques Protectores Los Cedros, Maquipucuna (=Maqui), Mashpi, Intag Cloud Forest Reserve La Florida (=F), El Refugio de Intag Lodge (R) as well as Reserve records (La Florida and El Refugio) and the IBA for the Intag (2017, =I). Since the two Intag reserves are small (<500 ha) and close together (±2 km apart), we combined them into one column, Intag, but with the source of the data indicated too. *=considered extinct but rediscovered in the Toisán Range, which borders the Intag Valley (Jahn 2008).

Colors: red=critically endangered, yellow=endangered, pink=vulnerable, pale yellow=near threatened, lilac=unique to one of the areas studied
